

## EH&S Representative Role for College/Unit Safety Advisory Committee

An EH&S representative will serve on the university's college/unit safety advisory committees as assigned. Function as the primary contact and EH&S resource and technical expert to the college/unit safety advisory committee members to help drive internal safety process improvements within the colleges/units per the Workplace Safety Culture task force recommendations. On behalf of EH&S, work with the college/unit safety advisory committee chair and members to assist with safety culture improvements, provide leadership, expertise, and serve as conduit of information exchange between the college/unit safety advisory committee and EH&S.

Develop and track key performance (KPI) metric data within individual EH&S program areas and program assessments as assigned. Report out key performance data on a semi-annual frequency to EH&S management, with KPI data also being communicated to the College/Unit Safety Advisory Committee members. KPI information to be used to guide safety efforts of the program and within the respective college safety advisory committees.

Develop and document process maps/standard operating procedures for each assigned program element related to assessments and program implementation. Utilize the process maps for purposes of program evaluation, continual program improvement, and cross-training for other EH&S staff and the college/unit safety advisory committee members.
