4. Accident & Inspection Reports

4.1 Accident Reports

Dave Adams from SAIF presented 5-year data trends based on the university's time/loss data. The committee was asked to decide what information would be good to help in the decision-making process of where to focus attention/resources.

One idea was to do a quarterly review with an emphasis on providing seasonal (heat training before summer) and hazard (most frequent historical injury) training.

There was also a discussion on what kind of data and information can be provided and in what form it might take. The committee was encouraged to:

- Focus on things that they can have an effect on.
- Help the partnership between EHS and campus units.
- Set goals ahead of time to direct focus.

4.2 Fire Safety Inspections

Any concerns over inspection items should be sent to Brian Lilley or Jim Patton. Otherwise deficiencies are expected to be corrected by the reinspection date.
