

OSU Chemical Safety Committee

Committee Charge and Purpose

The Chemical Safety Committee focuses on chemical safety issues relating to OSU campuses and off-campus research and instructional activities and its members are charged with the following key responsibilities:

- Review/approval of protocols for chemical carcinogen use and other chemicals that may necessitate Committee review due to unique or special hazards.
- Provide guidance on chemical safety training resources for staff and students.
- Annual review and approval of substantive changes to the OSU Chemical Hygiene Plan.
- Provide review and feedback of EH&S proposed chemical management resources, procedures, or technologies.
- Review of chemical safety assessment statistics and trend data as generated by EH&S.
- Coordinate with other OSU research oversight committees as requested for studies involving hazardous or cytotoxic chemicals.
- Consideration for review of chemical-related hazards not covered by the other campus research oversight committees.
